

## **The New Automated Army Suggestion Program**

Soldiers and Department of the Army civilians may now go online to the Army Suggestion Program, at [https://armysuggestions.army.mil/services/asp/asp\\_home.cfm](https://armysuggestions.army.mil/services/asp/asp_home.cfm) to submit their "Good Ideas". This website facilitates the suggestion submission, improves the timeliness for processing suggestions, and also assists with reporting procedures.

Logging on requires an Army Knowledge On line (AKO) user name and password. This automated format replaces any hard copy documentation that has been used in the past. It's the new and only way to submit suggestions.

The new program still seeks ideas that improve work methods, materials, processes, equipment, logistics, utilities or tools that will benefit the Army. Approved and implemented suggestions that save the Army money are often eligible for a cash award. The more money saved, the larger the potential award. The suggestion must present a problem or situation, propose a solution and state the benefit to the government.

The Army Suggestion Program at the USAG BENELUX is managed by the Plans, Analysis and Integration Office (PAIO) located at building #30, Caserne Daumerie, Chievres. Any questions regarding the Army suggestion Program may be directed to the Management Analyst, at DSN 361-5546 or commercial phone at 068/275546.
